

SIGEL

OFFICE SOLUTIONS

**Innovative solutions
for work that inspires**

SIGEL. WORK INSPIRED

For decades, SIGEL has inspired people at work. What started out as a printing press for forms has evolved from paper to pixels, from printed matter to smart online services. SIGEL has always kept abreast of change and helped to shape it.

As an expert in forward-looking workplace design, SIGEL is the ideal companion on the path towards the future, towards work 4.0.

SIGEL RECOGNISES THE TRENDS

From dismal open-plan offices to motivational open work spaces, from dusty departments to agile work groups – the changes in the working world demand a change in attitude. And a new set-up.

WE DEVELOP SMART PRODUCT SOLUTIONS FOR OFFICES

We take people and their everyday needs in the office as our point of reference. And then we develop innovative products for them that increase motivation, encourage creativity, facilitate collaboration and improve the efficiency and productivity of the team in an inspirational environment.

A STRONG PARTNERSHIP

For 75 years, SIGEL has prioritised strong partnerships. We are open to feedback during all phases of your project, from the planning stage to the finished product. We will work with you to find a solution for all of your customers' needs.
